What We Do

Red Teams

- Penetration Testing
- Red Team Assessment
- Application Security
- Device & IoT Testing

Purple Teams

- Red & Blue Team Collaboration
- Open Book Testing
- MITRE ATT&CK Heat Mapping
- Threat Resilience Benchmark Scoring
- Historical Reporting

Blue Teams

- Strategy
- Cyber Resilience
- Engineering
- Security Data Pipeline
- Table-Top Exercises
- Compliance

CyberSOC

- Dedicated Team
- Monitoring
- Threat Intel and Hunts
- Purple Teams
- SIEM/EDR Tuning
- Incident Response & Forensics

Solutions

- VECTR™ (vectr.io)
- SIFTR™ (siftr.sra.io)
- SCALR™ XDR (scalr.sra.io)
- SCALR™ VM

AI

Helping you protect your business, your people, and your customers.

Intern (co-op) and graduate opportunities at SRA (Overview)

- Extensive training and oversight provided
- Assigned manager
- Team shadowing and support

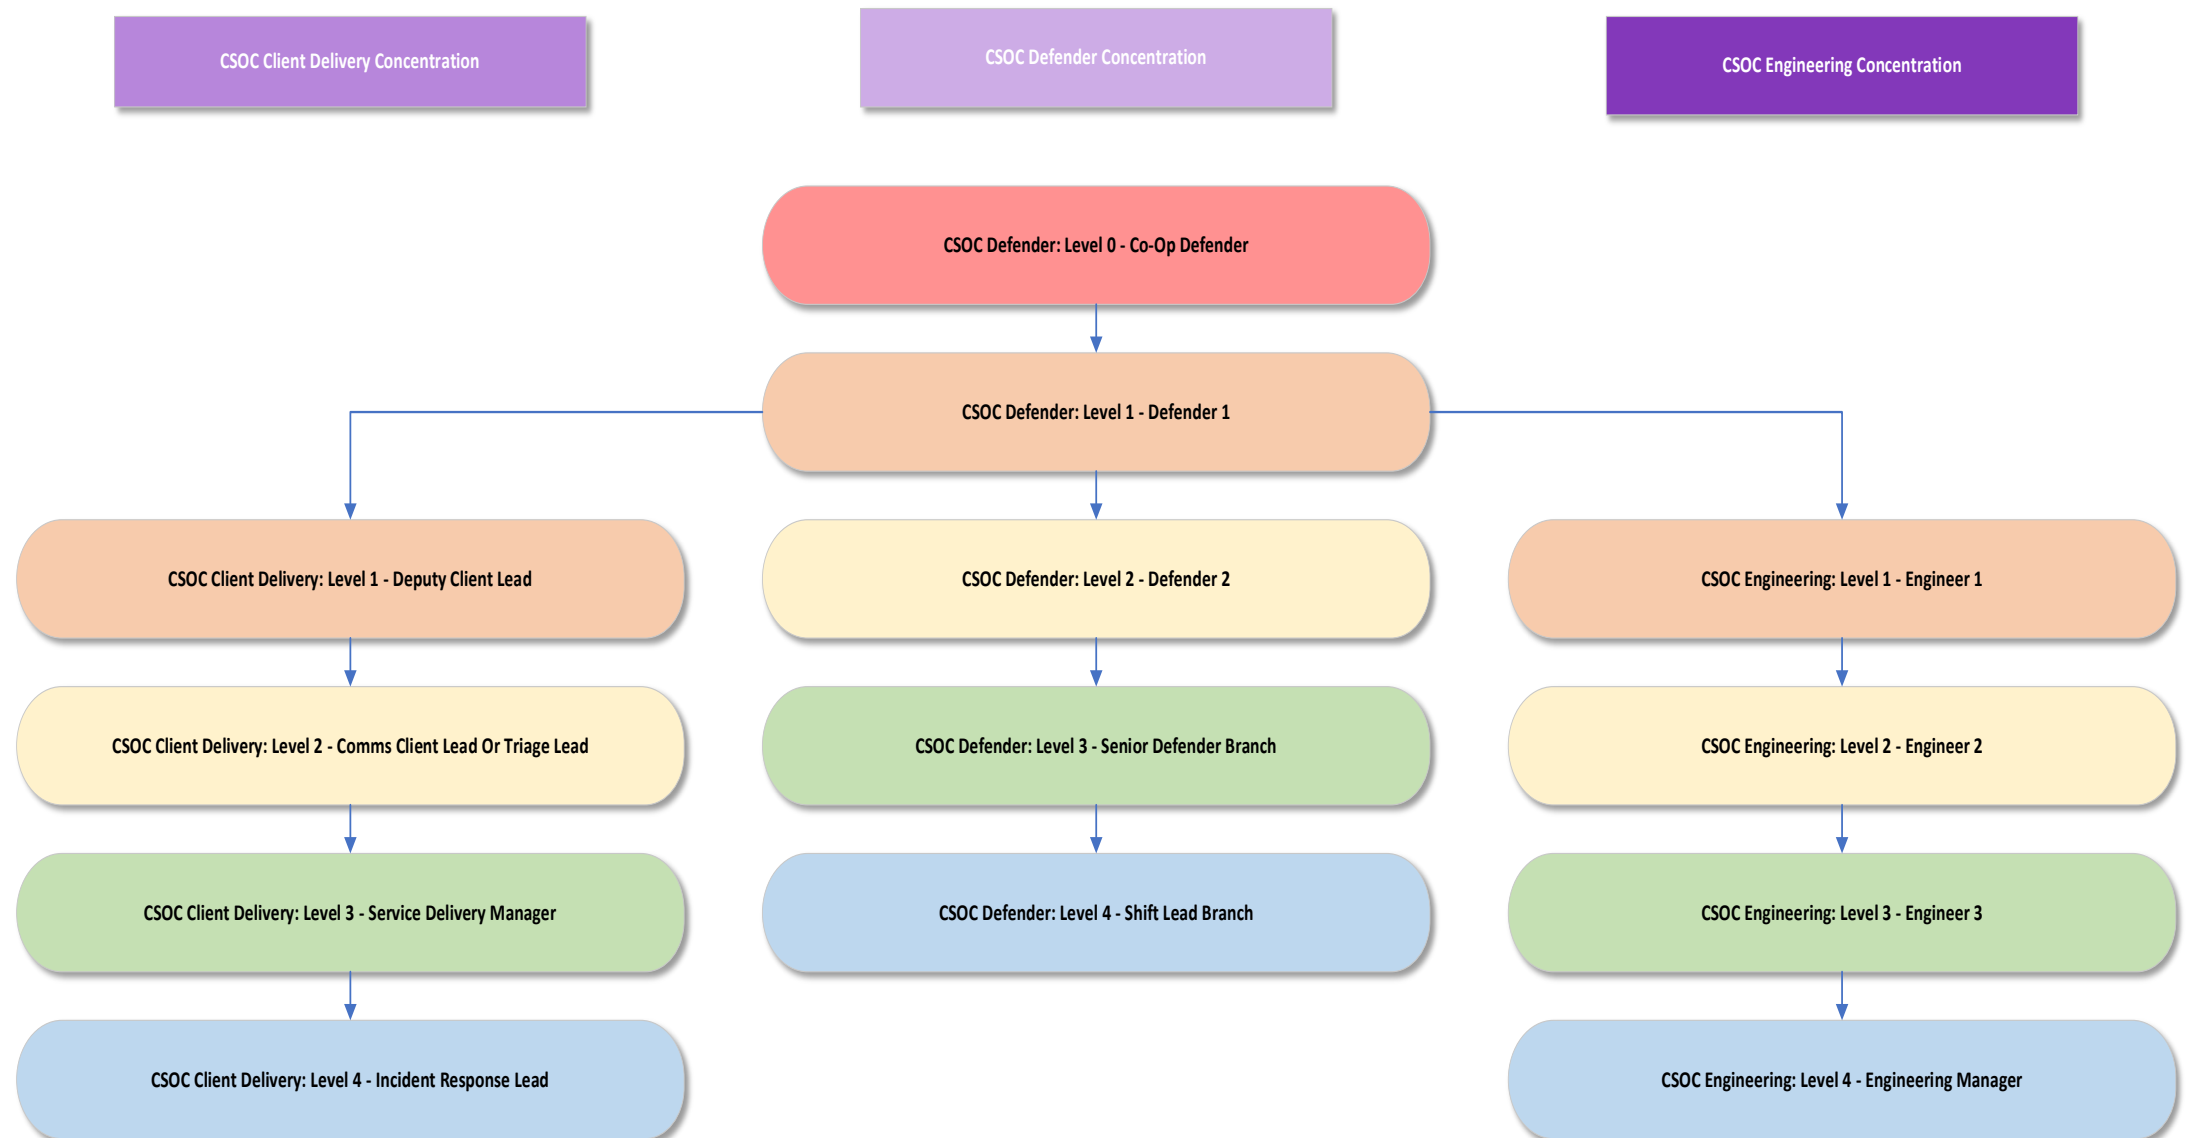

Advisory Blue

- ADVISORY & ENGINEERING
- Preparing architecture plans
- Configuring cloud resources
- Writing code KQL, Python, Java & JSON format
- Managing projects
- Reviewing technical configs
- Recommending security controls
- Drafting client reports

CSOC

- XDR & ENTERPRISE SOC
- Alert Triage and Analysis
- SIEM/EDR solutions
- Tuning & analytics
- Vulnerability Management:
- Incident Response (IR)
- Threat hunts (support)
- Threat intelligence reporting
- Engineering & Security Architecture

CSOC Growth Tracks

Overview of extracurricular learning areas & skills for cybersecurity graduates to pursue

TECH SKILLS (and related certifications)	SOFT SKILLS
✓ Windows architecture (and Linux) Registry/Active Directory/common logs/PowerShell ✓ Networking and Internet TCP/IP, DNS, routing, subnetting, IP addresses ✓ Scripting and Automation Scripting in PowerShell, Bash or Python, APIs ✓ Cloud (security) experience Hands-on Azure/AWS, Kubernetes, CLI, terraforming ✓ Data Fluency (and OSI model) Logs, ports, packet traces, endpoint telemetry ✓ AI Ecosystem How AI enhances defense How it empowers attackers How to secure the AI systems themselves And Ethics and dangers (e.g. vibe coding) ✓ Understands attack flow and attacker logic MITRE ATT&CK, Lockheed Martin kill chain	✓ Analytical & Report Writing Incident reports and risk assessments require clarity and precision. ✓ Ethical Mindset Employers look for maturity in handling sensitive data and systems. ✓ Critical thinking Root cause analysis ✓ Risk appraisal Knowing how to quantify and prioritise risks elevates technical skills. ✓ Collaboration & communication Cyber teams work across IT, compliance, business units and external clients ✓ Initiative Curiosity, engagement and interest, home labs, CTFs

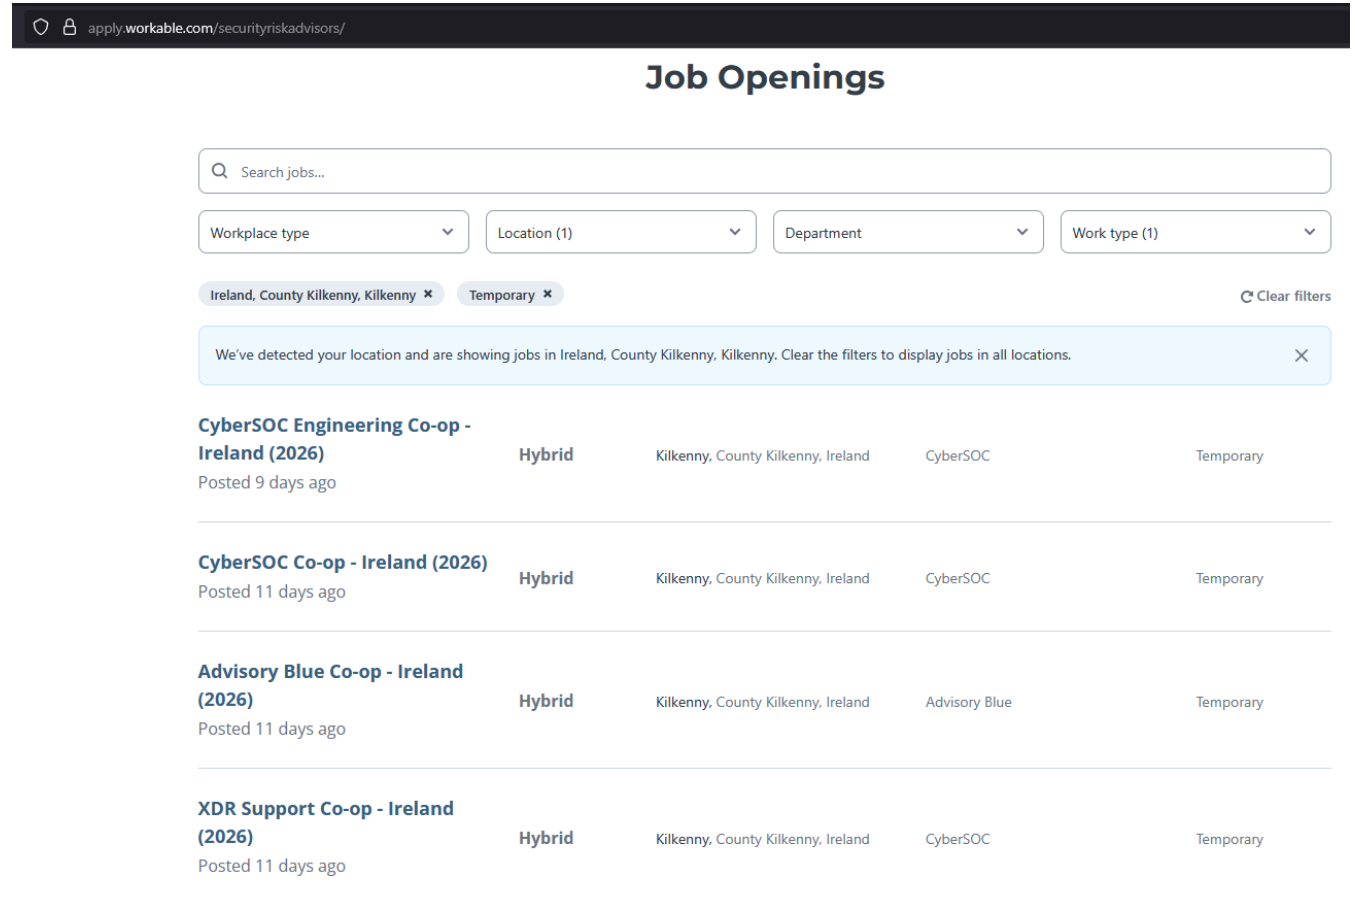

Q&A (+ how to apply + takeaways)

When applications open

- Go to sra.io/careers 
- Filter for Location: **Kilkenny** and Work type: **Temporary**

The ideal intern/graduate is...

- ✓ **Hands-on:** CTFs, home labs (TryHackMe, HackTheBox) CEH
- ✓ **Learns the tools:** Azure, Sentinel, Splunk, Defender and related certs...
- ✓ **Thinks like an attacker:** MITRE ATT&CK Framework and Lockheed Martin Cyber Kill Chain
- ✓ **Communicates like an advisor:** PM skills
- ✓ **Ambitious:** and professional
- ✓ **Organised:** with a strong work ethic
- ✓ **Team player:** but can work independently
- ✓ **Continuous learning:** follows cybersecurity news
